## PROJECTS

### Project: Dune - Online Movie and Series Streaming Platform

"Dune" is a feature-rich online streaming platform designed and developed from scratch. Leveraging HTML, CSS, and JavaScript, I created an intuitive and user-friendly front-end interface, ensuring a seamless user experience. The back-end functionalities were powered by Node.js and Express, enabling robust server-side operations. To enhance dynamic content rendering, I utilized EJS (Embedded JavaScript) templates. Moreover, the platform employed a MySQL database for efficient data management and storage.
